WALL SURROUND

A Wall Surround is a wall system custom cut to fit perfectly over existing walls in the wet area of the bathroom. It is manufactured using a sheet of co-extruded DR/ABS (Durable Rubber Acrylic/Acrylantril Butadine Styrene). This sheet has a thickness of .120".

On the acrylic portion of the product, the DR is the top 15% of the sheet. It is pigmented a solid color than modified for a high impact surface. The ABS is the bottom 85% of the sheet. Like the DR, it is also pigmented. ABS is used because it is rigid, yet capable of flexibility.

- Meets or exceeds Anzi code: Z124.8-1990
- Installed over existing walls
- 3-wall system is custom fit
- High gloss finish
- 90 degree bend on front panels for a finished look
- Thickness of acrylic sheet: .120"
- Consists of DR/ABS
 - DR: Durable Rubber Acrylic
 - ABS: Acrylantril Butadine Styrene

15% DR: Durable Rubber Acrylic

85% ABS: Acrylantril Butadine Styrene
